

ACCEL/DFI Products and Part Numbers

DFI *Super 7* Series

Programmable Engine Management Systems

The new Accel/DFI Generation 7+ Engine Management System is the best equipped, most capable, and easiest to use system in its class.

Best Equipped

Every DFI Generation 7+ Engine Management System comes equipped with multiple software-selectable fuel and ignition control strategies. The following control strategies are available in the module as it comes from the factory:

Fueling Strategies

- Sequential (Cam signal required)
- Staged Sequential (Cam signal required).
- Staggered Batch (Bank to Bank).
- Throttle Body Injection (Standard, TBI Staged)
- Throttle Body Injection (Dual-Quad, Multiple TBI staged).

Ignition Compatibility:

- GM High Energy Ignition
- Ford Thick Film Module
- Inductive Pick-up Crank Trigger or Distributor type
- Hall Effect -- Crank Trigger or Distributor
- Buick GN Multiple Coil packs
- Ford EDIS
- Other Custom, User Defined Settings.

Most Capable

In addition, each and every DFI Generation 7+ Engine Control Module is capable of controlling a wide variety of both standard and optional accessory items. Each module also includes several advanced functions that set it apart from the competition.

Accessory Controls:

- Standard (HEGO) Oxygen Sensor Control
- Linear Wide Band (UEGO) Oxygen Sensor Control
- Dual Fan Control
- 3 Stage Nitrous Control

- Transmission Torque Converter Lockup (TCC) Control
- Shift Light Control
- Air Conditioning (A/C) Clutch control
- Malfunction Indicator Lamp Output
- Knock Sensor Control
- 2-Step Ignition Rev Limiting
- Fuel and Ignition based Max Rev Limiting

Advanced Features:

- Dual Fuel Mapping for Starting Line Launches
- Dual Fuel Mapping for Auxiliary Fueling Strategies
- Turbo Boost Builder for Turbocharged Applications
- Idle Air Controller (IAC) Request Feed Forward Compensation
- Nitrous Engine Saver Control
- VTEC Output Control
- Advanced Performance Data Analysis

Easiest To Use

The DFI Generation 7+ ECM also has many built-in functions designed to make it the most versatile, easiest to use programmable engine management system on the market today. Built-in ease-of-use features include:

- Patented, Real-Time Editing of Engine Control Parameters
- Patented Nitrous Control System
- Real-Time, Graphical Data Displays -- See It as It Happens
- Online Access to Help, Schematics, and Wiring Diagrams
- 3-Dimensional Graphical Calibration Environment
- High or Low Impedance Injector Control
- Integrated Data Logging and Analysis System
- Fuel Map Auto Generation Utility
- Fuel Injector Pulse Width and Duty Cycle Predicting Utility
- Onboard Diagnostic System with Automatic Fault Compensation
- Hardened electronic circuitry with Built-In Hardware Protection
