

# ThermoCap

The Ultimate Radiator Cap

- Wide 30 to 270 °F temperature range
- Calibrated in centigrade and fahrenheit
- Color coded temperature ranges
- Chromed crown with a colored trim ring

Blue

Red

Silver

*Anodized accent colors*

## High Quality Components For Long Life

- Indicates coolant temperature
- Helps to prevent coolant injuries
- Integrated coolant reclamation valve
- Improves underhood appearance
- Fits most domestic or import vehicles
- Various valve pressures available

## Enhanced Safety For You

Knowing your coolant temperature can help to prevent burn injuries. ThermoCap, with its built-in calibrated thermometer, indicates the coolant temperature. This is useful information prior to cap removal. Never attempt to remove ThermoCap when the coolant temperature is very hot. The escaping hot coolant and steam may burn you. Check the ThermoCap temperature indicator to determine if the coolant is cool enough to make removing ThermoCap safe. If the coolant is very hot, then thoroughly rinse the radiator with cool water, until the coolant temperature drops into a cooler safe zone

ThermoCap's Integrated coolant reclamation valve works great with your coolant recovery system. Your radiator can reclaim coolant from your overflow bottle.

*As of October 2004, there were 231,389,998 vehicles currently registered in the USA (Source: FHWA). The current median age: 9 years. With radiators this old, overheating is a typical problem. It is also typical for overheating victims to try to remove the radiator cap to check the coolant level. A risky move. ThermoCap removes this risk (of being burned by hot coolant) by indicating the coolant temperature, with a calibrated meter, at the filler neck of the radiator. Granted, many vehicles are equipped with a dash mounted temp gauge. However, if they work, most are not calibrated with any numbers, which leaves victims in the dark regarding what the temperature actually is.*

## Package Information:

Case pack: 12 units per case

Case weight: 6.3 lbs per case

Case size: 19"W x 13"D x 8"H

## Part Numbers:

- #2470R Domestic thermocap 13 psi - red
- #2470B Domestic thermocap 13 psi - blue
- #2470S Domestic thermocap 13 psi - silver
- #2471R Domestic thermocap 16 psi - red
- #2471B Domestic thermocap 16 psi - blue
- #2471S Domestic thermocap 16 psi - silver
- #2472R Import thermocap 13 psi - red
- #2472B Import thermocap 13 psi - blue
- #2472S Import thermocap 13 psi - silver
- #2473R Import thermocap 16 psi - red
- #2473B Import thermocap 16 psi - blue
- #2473S Import thermocap 16 psi - silver
